TO: Minerals File

FROM: Tony Gallegos, Reclamation Engineer 

RE: Site Inspection, Dick Shumway, Limer Mine, S/037/086, San Juan County, Utah

Date of Inspection: June 12, 1996
Time of Inspection: 1135 - 1150
Conditions: Partly cloudy, warm
Participants: Sal Venticinque, BLM; Tony Gallegos, DOGM

Purpose of Inspection: To examine the project site while in the area.

This site is accessed by taking an existing two-track road off the main road toward a wash. Once the two-track road gets to the wash, there is flagging marking the main access road across the wash up to the proposed mine area. The proposed mine area is located in the pinion-juniper area. At this time, no new access road has been constructed across the wash; there are no mining disturbances in the area. Photographs were taken of the proposed project area, which will show flagging in the main area for the mine site. Since there currently are no disturbances, there are no concerns by the Division or the BLM at this time.
